

Each $4n \times 4n$ matrix is a 4×4 grid of $n \times n$ blocks

A (dense operator)

	$\hat{u}$	$\hat{v}$	$\hat{T}$	$\hat{p}$
continuity + state	$i\alpha I$			
x-momentum				$i\alpha/\bar{\rho}$
y-momentum				$\bar{\rho}^{-1}D$
energy			$i\alpha\bar{U} - c_k \mathcal{L}_c$	

B (holds the c coefficients)

	$\hat{u}$	$\hat{v}$	$\hat{T}$	$\hat{p}$
continuity + state				
x-momentum				
y-momentum				
energy
